Up to 75,000 INR (196 USD) p.a to support the Long term research focusing on longitudinal research of observing the variables over a period of time.

Description: Long-term research is a study design that considers observing the same variables over time in a focused method that brings together a group of people in a moderated setting.

Purpose: Research is the fuel for future progress. Long-term study significantly shapes perspectives and provides unique insights to look at how certain things may change at different points in life and explore explanations of why these shifts take place.

Scope: In these studies, participants are observed for a long-term period (x number of months and years) to look at how different environment influences personality, achievement, and other areas within the variables to seek common or different patterns, characteristics and influences.

Eligibility:

Applicants must:

- Be a post-graduate student or early career psychologist (a doctoral-level psychologist or licenced RCI MPhil (no more than 10 years).
- Have a demonstrated knowledge of research methods, applicative statistics, clinical and trauma
- Have demonstrated competence and capacity to execute the proposed work.
- Have a published research paper or be in the process of publishing.

How to Apply:

- Interested Applicants may submit the following to office@ijngp.com
- Abbreviated CV (not to exceed five pages)
- Research Project for initial screening
- Certificate of Publication or Published Research Paper with DOI for proof of work.
