Research-Based Knowledge Resource Development Project

Introduction:

The best teaching and learning process occurs in environments with a strong culture of research and knowledge creation. The **Research-Based Knowledge Resource Development Project** is an initiative under the **Learning and Research Grants** to design academic resources in the form of articles, books, literature reviews, audio-visual courses, etc in the subject of Research, Neurolinguistics & Gestalt Psychology made easily accessible to the students.

Need:

Students and researchers spend an enormous amount of time navigating through reliable data but are too exhaustive and find it expensive while simultaneously checking validity for specific, actionable steps. This project helps in the development of new resources or improving the efficiency of existing resources (like enhancing resource use efficiency) that would improve **learning outcomes** and contribute to **growth in research**.

Impact:

The scope of the Knowledge-Based Resource Development Project is to design and develop **rich academic resources** in the medium of audio, video, and PDF formats from industry experts and academicians made available to students, research aspirants, researchers, subject matter professionals, scholars, and clinicians, in the domain of Research, Neurolinguistics & Gestalt Psychology.

Duration of the Project

1 year - 2 years

The **Research-Based Knowledge Resource Development Project** requires action on many fronts including **greater allocation** of funds to work out how to fast-track decision-making, and information sharing, and allow **researchers more flexibility** in utilizing the funds. This can be the desired path to **inculcate and sustain** a culture of **curiosity and inquisitiveness** as well as create a more dynamic system in the country.

Call for Support

Introduction:

According to UNESCO, the **expenditure on Research and Development (R&D)** is more than **\$1.7 trillion** across the globe. This signifies the importance of R&D in the modern world where countries are placing **extensive focus** on their R&D programs to gain a **competitive edge** in the **fast-changing development-driven world**.

India is a low spender (only **0.66%** of the GDP) in comparison to developed countries. The Gross Domestic Expenditure on R&D (GERD) as a percentage of gross domestic product (GDP) is around **0.7%** which shows a downward trend in the last couple of years.

Impediments

Low Funding: The funding is less than **1%** of the GDP.

High Dependence on Grants: Many universities/institutes depend on an **extramural support** system which creates a dependency situation where the **quality of research** at the doctoral level gets **hampered** when less funding is provided to these institutions.

Lack of Skilled Personnel: There is a **lack of adequate expertise** in many emerging research areas. Further, the **talents** of our country **migrate** abroad as they don't receive the **requisite** for doing good quality research.

Steps that can be taken

Collaborations between public institutions and start-ups/industries can be **supported to mentor and train** students/scientists to pursue the doctoral and postdoctoral levels. Simultaneously, **postdoctoral** work in India should be **encouraged** by providing better **remuneration** and opportunities to **young scientists and researchers**.

Appeal

Up to 1,60,000 INR (1,956 USD) p.a to support the project focusing on the applicability of content and knowledge-based resource development which would be used in remunerations of Research Assistants, PhD scholars, Industry Experts Remuneration fee Software like SPSS, R etc.

Call for Research Applicants

Eligibility for application to be a part of this Project:

Applicants must:

- Be a postgraduate student or early career psychologist (a doctoral-level psychologist or licensed RCI MPhil (no more than 10 years).
- Have a demonstrated knowledge of clinical, trauma, literature and philosophy.
- Have demonstrated competence and capacity to execute the proposed project.
- Have a published or are in the process of publishing a research paper.

How to Apply:

Interested Applicants may submit the following to office@ijnngp.com

- Abbreviated CV (not to exceed five pages)
- Research Project for initial screening
- Certificate of Publication or Published Research Paper with DOI for proof of work.

Past Recipients :

Anushka Kharbhanda
College: Amity University
City: Vadodara

Sushmitha Subramani
College: Amity University
City: Delhi

Deepshika Relam
College: VES College
City: Mumbai

Vidhita Choudhary
College: Mount Carmel College
City: Bangalore

Nivea D'Souza

Corporate Communications & Co-ordinator
International Journal of Neurolinguistics & Gestalt Psychology
